AUTO/ 0025

AMENDMENTS TO THE CLAIMS

- (Canceled). 1-25
- (Previously Presented) A method for performing textured mapping of a target area, the 26. method comprising the steps of:

identifying an aperiodic tile set;

selecting a placement of said aperiodic tile set on a textured image area;

based on said placement, generating textured tiles by mapping said aperiodic tile set onto said textured image area; and

covering said target area in an aperiodic tiling pattern with at least one textured tile selected from said textured tiles.

- (Previously Presented) The method of claim 26, further comprising the step of: receiving 27. input that defines said textured image area.
- (Previously Presented) The method of claim 26, wherein said step of covering said target 28. area in said aperiodic tiling pattern with said textured tiles includes the step of: placing said texture tiles in an overlapping configuration on said target area.

29-30. (Canceled).

(Previously Presented) A computer-readable medium carrying one or more sequences of 31. instructions for performing textured mapping of a target area, wherein execution of the

one or more sequences of instructions by one or more processors causes the one or more processor to perform the steps of:

identifying an aperiodic tile set;

selecting a placement of said aperiodic tile set on a textured image area;

based on said placement, generating texture tiles by mapping said aperiodic tile set onto

said textured image area; and

covering said target area in an aperiodic tiling pattern with at least one textured tile

selected from said textured tiles.

- 32. (Previously Presented) The computer-readable medium of claim 31, wherein said execution causes said one or more processor to perform the step of: receiving input that defines said textured image area.
- 33. (Previously Presented) The computer-readable medium of claim 31, wherein said step of covering said target area in said aperiodic tiling pattern includes the step of: placing said texture tiles in an overlapping configuration on said target area.

34-35. (Canceled).

36. (Previously Presented) The method of claim 26, wherein said step of selecting said placement of said aperiodic tile set includes the step of: placing at least two aperiodic tiles from said aperiodic tile set in an overlapping configuration on said textured image area.

288652_1

(Previously Presented) The method of claim 26, further comprising the step of: 37.

From-Moser, Patterson & Sheridan, L.L.P.

combining colors of a first texel from a first texture tile and a second texel from a second

texture tile, wherein said first texel and said second texel map to a single pixel within said

target area.

(Previously Presented) The computer-readable medium of claim 31, wherein said step of 38.

selecting said placement of said aperiodic tile set includes the step of: placing at least two

aperiodic tiles from said aperiodic tile set in an overlapping configuration on said

textured image area.

(Previously Presented) The computer-readable medium of claim 31, further comprising 39.

the step of: combining colors of a first texel from a first texture tile and a second texel

from a second texture tile, wherein said first texel and said second texel map to a single

pixel within said target area.
